

The Expanding World of Nanofabrication – *an update from NanoFabrication Kingston*

November, 2021

Good day,

You are receiving this important update as a user of NFK, as a supervisor of a user, or as someone who requested to receive these updates.

Holiday break

NFK will be closed from **Dec. 20 at 4:30 pm** until **Jan. 3, 2022**. The equipment will be shut down during this period, so please plan your experiments accordingly. During the week of Jan. 3-7, annual maintenance activities will keep the equipment occupied at various times. Please email me ahead of time if you need access to specific equipment that week so I can plan the maintenance around your schedule, if possible.

COVID-19

Please remember to follow the [guidelines](#) posted on the Chemistry Department website when you visit NFK. Cases in Kingston are growing, and we want to do our part!

We want to hear from you

NFK is always interested in hearing about your research. Has your work at NFK led to a publication or conference presentation? If so, please let us know. We are constantly updating our [list](#) of peer-reviewed journal articles showcasing work done at NFK. We also welcome feedback about our tools and services. Feel free to forward your questions, concerns, complaints, or praise to [me](#), and I will do my best to respond.

See you at the lab!

Graham Gibson
